

To change the batteries on the Glass Break Detector:

- Holding the cover and base, twist the cover in a counter-clockwise motion. When the imprinted arrows on the side of the detector are aligned, separate the unit.
- Remove the old batteries.
- Insert the batteries in the compartment CR123A 3V Lithium batteries (x2). Always match the plus (+) sign on the battery with the flat side of the compartment and the minus (-) sign on the battery with the spring side of the compartment. It takes approximately five (5) seconds for the detector to power ON.
- Holding the cover, align the imprinted arrows on the detector and then twist the cover in a clockwise motion to close the unit.
