

## Connect Google Home to Alarm.com

### Requirements

To use Alarm.com with Google Home, you must have:

- An Alarm.com customer account.
- Lights, thermostats, locks, garage doors, or a security panel powered by Alarm.com.
- An iOS device with the Google Home app and Google Assistant app downloaded, or an Android device with the downloaded Google Home app and the native Google Assistant.

**Important:** Google Home's primary language must be set to English to function properly.

### Set up Alarm.com with Google Home using Android devices:

To configure Alarm.com with Google Home on Android:

1. Google Assistant must be trained to recognize your voice.
2. Must have the Google Home app downloaded.
3. Google Home has been connected to the Wi-Fi network and set up on your Google Home app.

### Using *Explore* in the Google Home app on Android:

1. Open the Google Home app on the mobile device.
2. Tap the **Menu** icon.
3. Tap **Explore**.

**Note:** If *Explore* is not found in this menu, return to the Device settings and train Google Home to recognize your voice.

4. Enter "Alarm.com" in the search field.

**Note:** Some Android phones, like the Pixel, does not have a search bar here. In that case:

- a. Flick to *Home Control*. This *Home Control* option is different than Google Home's native device control option, which is also labeled as Home Control within the Google Home app menu.
- b. Swipe until Alarm.com is seen.
- c. Tap the **Alarm.com** card.

5. Tap **Link**.
6. Using your Alarm.com username and password, log into Alarm.com and link the account to Google Home.
7. Tap **Allow**.
8. The Alarm.com account is now synced with Google Home.

---

### Set up Alarm.com with Google Home using iOS devices:

To configure Alarm.com with Google Home on iOS:

1. Download the Google Assistant and Google Home app.
2. Setup the Google Home using the Google Home app.
3. Train the Google Assistant to recognize your voice during the device setup process.

**Using *Explore* in the Google Home app on iOS:**

1. Open the Google Home app on the mobile device.
2. Tap the **Menu** icon.
3. Tap **Explore**.
4. Enter "Alarm.com" in the search field.

**Note:** Alternatively, click **All Categories** from the main page of the Google Home app.

- a. Tap **Home Control**.
    - This *Home Control* option is different than Google Home's native device control option, which is also labeled as Home Control within the Google Home app menu.
  - b. Flick to find Alarm.com. The card may be under multiple categories (e.g. Control Home Security, Control Temperature and Air, Control Lighting, etc.).
  - c. Tap the **Alarm.com** card.
5. Tap **Link**.
  6. Using your Alarm.com username and password, log into Alarm.com and link the account to Google Home.
  7. Tap **Allow**.
  8. The Alarm.com account is now synced with Google Home.
